OOP PRACTICAL 5

TO OVERLOAD THE VOLUME () FOR A CUBE AND A CUBOID

NAME : SOHAM SACHIN KULKARNI
PRN : B25ET1170
BATCH : B3

```
#include <iostream>
using namespace std;

class Volume
{
public:
    void volume(int side)
    {
        cout << "Volume of Cube = " << side * side * side << endl;
    }

    void volume(int length, int breadth, int height)
    {
        cout << "Volume of Cuboid = "
             << length * breadth * height << endl;
    }
};

int main()
{
    Volume v;

    int side, length, breadth, height;

    cout << "Enter side of cube: ";
    cin >> side;
    v.volume(side);
```

```
    cout << "Enter length, breadth and height of cuboid: ";
    cin >> length >> breadth >> height;
    v.volume(length, breadth, height);

    return 0;
}
```

OUTPUT :
